```java
public static void main(String[] args) {
    System.out.println("Hallo␣Welt");
}
```

Das ist c++:

```cpp
#include <iostream>
public static int main(int argc, char** argv) {
    std::cout << "Hallo␣Welt" << std::endl;
    std::cout << "Die␣Äntwört␣ist:␣" << 21*2+14−(2*7)
        << std::endl;
}
```
